

Jennewein Biotechnologie GmbH is a leading producer for rare monosaccharides and oligosaccharides for applications in nutritional, pharmaceutical, and cosmetic products. Our core competence lies in the large-scale production of rare carbohydrates, using synthetic biology approaches in combination with our pioneering work in commercialization of biotechnology products world-wide. Our ambitions are no less than bringing products obtained by biotechnology into the market, to the benefit of people and their health and well-being. Key to this is the successful market approval of our product world-wide. Jennewein Biotechnologie was first to file an EFSA Novel Food application for a food product manufactured by using a recombinant bacterial processing aid.

We are searching a

Regulatory Affairs Manager / Senior Regulatory Affairs Manager (m/f)

Tasks and responsibilities

We are looking for outstanding candidate for managing of world-wide novel food registrations projects, which includes the management of diverse teams of external regulatory consultants, science writers, external toxicology and analytical labs for the purpose of filing world class registration dossier, managing of dossier submission, and to collaborate with customers with own extensive regulatory experiences in their fields and markets. Candidates are expected to meet with governmental officials, country specific regulatory consultants and to participate in official as well as non-governmental workshops related to registration policies and technical workshops world-wide.
