

Jennewein Biotechnologie GmbH is a leading producer for rare monosaccharides and oligosaccharides for applications in nutritional, pharmaceutical, and cosmetic products. Our core competence lies on the large-scale production of rare carbohydrates, using synthetic biology approaches in combination with our pioneering work in commercialization of biotechnology products world-wide. Our ambitions are no less than bringing products obtained by biotechnology into the market, to the benefit of people and their health and well-being. For our new Innovation Center at Bonn, we are currently looking for a:

Scientist (M.Sc. or Ph.D.) for bacterial fermentation

Your tasks and responsibilities

- You will be responsible for the organization and performance of fermentation processes in lab-scale, optimization of fermentation processes and technology transfer to our industrial fermentation department.
- You are responsible for the maintenance of the equipment.
- You will work in a interdisciplinary team with close communication to scientists in the field of strain development, analytics and downstream processing.
- You will report to your supervisor and the management.

Your profile

- You have an academic degree (M.Sc. or Ph.D.) in biology, biotechnology, biochemistry, or a related area.
- You have an excellent scientific background in bacterial metabolism and process development.
- Additionally, you have expertise in fermentation and development and optimization (e.g.DOE) of fermentation processes.
- You have excellent expertise in microbiology, working with bacteria and yeast.
- You are skilled in project design and coordination, and you keep your projects in time.
- You are highly motivated and curious in science, and you are willing to work interdisciplinary. You are flexible and you are seeking for solving problems.
- You are open-minded, and you have excellent communication and interpersonal skills. You can represent the company in public.
- You have experience in personal management.
- You speak English fluently, German is a benefit.

We offer

- A collegial, cooperative and motivating working atmosphere with flat hierarchies and short decision paths
- An internationally active and dynamically growing company in a high-tech sector with long-term perspectives
- A challenging, varied activity
- Independent, responsible work
