

Jennewein Biotechnologie GmbH is a leading producer for rare monosaccharides and oligosaccharides for applications in nutritional, pharmaceutical, and cosmetic products. Our core competence lies on the large-scale production of rare carbohydrates, using synthetic biology approaches in combination with our pioneering work in commercialization of biotechnology products world-wide. Our ambitions are no less than bringing products obtained by biotechnology into the market, to the benefit of people and their health and well-being. For our new Innovation Center at Bonn, we are currently looking for a:

Microbiologist (m/f) with experience in microbiome/genomics/bioinformatics

We are looking for...

... an outstanding candidate for our microbiome studies in the field of infant and medical nutrition products. Ideally, you are a microbiologist and have already studied in topics such as genome annotation, transcriptomics and/or complex microbial ecosystems.

Your profile

- Doctorate related to genome / microbiome analysis
- Strong background in bioinformatics tools, including Linux and R-based application programs.
- Programmer experience with Perl and / or Python would be desirable.
- Experience in the anaerobic field would be beneficial.
- International research experience.
- Very good knowledge of English (oral and written communication).
- Non-German applicants should be prepared to learn German.

We offer

- An exciting, scientifically challenging and highly international working atmosphere
- Extensive and continuous education
- Permanent employment with long-term perspectives
- Attractive salary
